

Creating a Safe and Secure city

(Fire-fighting and Disaster Management)

Protecting citizens' lives: High quality crisis management system and disaster management education

Crisis management is, in the case of emergencies like fire, indispensable for protecting citizens' lives 24 hours a day, every day. This includes the establishment of high quality crisis management, and training of Fukuoka City firefighters on a daily basis. In times of disaster, the number of lives protected depends on composed behavior and awareness of disaster management by each citizen.

~Creating a safe and secure city with innovative disaster and emergency response facilities~

Fukuoka City has a special advanced emergency response unit, which deals with massive disasters and accidents. The unit exists in 18 major cities in Japan and works internationally, having been dispatched to disaster-stricken areas not only in Japan but also in other countries, including the site of the Sichuan earthquake in China. Members of the Fukuoka City unit were also dispatched, as an international fire-fighting and rescue party, to the site of the September 2009 earthquake in Sumatra, Indonesia.

【Training Menu】

01_Training in fire-fighting and rescue techniques SST-01

In order to master fire-fighting and rescue techniques as well as supervision and safety control at disaster sites, lectures and practical training will be given in various preventative measures and rescue activities (mountain and water accidents, in high and low altitudes), as well as in using fire engines and equipment for fighting various types of fire (buildings, woods, vehicles, planes, and hazardous materials).

02_Training in emergency techniques **SST-02**

Lectures and practical training will be given in emergency first-aid. Fukuoka City has one of the best medical control organization in Japan.

03_Training in prevention techniques **SST-03**

In order to master techniques required for fire prevention, lectures and site visits will be provided, which will cover regulations regarding buildings and dangerous facilities as well as the investigation of the cause of fires.

【Details of the Visit】

01_Fukuoka City Disaster Emergency Command Center **SSV-01**

A center equipped with progressive facilities which allow it to receive emergency reports and emergency dispatch response teams accordingly.

SSV-01

02_Fukuoka City Disaster Prevention Center **SSV-02**

This facility teaches disaster prevention related techniques through simulations, such as that of fire, earthquake, and gale-force wind. It is one of the most-visited-facilities in Japan.

SSV-02

03_Fukuoka City fire-fighting and air force base **SSV-03**

A facility that houses fire-fighting helicopters owned by Fukuoka City.

SSV-03

04_Fire stations (seven stations in the city) **SSV-04**

Fire engines and emergency response vehicles with fire-extinguishing capabilities respond to rescue and emergency calls around the clock.

SSV-04

Note: All the facilities but **Fukuoka City Disaster Prevention Center **SSV-02**** are exclusive to **people engaged in disaster management.**
